# 1 Inleiding

## 1.1 Aanleiding

De gemeente Lingewaard is sinds enkele jaren bezig met de ontwikkeling van het bedrijventerrein Houtakker II te Bommel. In het kader van de bestemmingsplanprocedure voor het bedrijventerrein is reeds gesproken over het mogelijk maken van een extra ontsluitingsweg tussen het bedrijventerrein en de Karstraat. Destijds is geconcludeerd dat dit nader onderzoek vergt en daarom is voor deze gronden een wijzigingsbevoegdheid in het bestemmingsplan opgenomen. Het college van burgemeester en wethouders van de gemeente Lingewaard is nu voornemens gebruik te maken van deze wijzigingsbevoegdheid om zo een extra toegangsweg juridisch-planologisch mogelijk te maken, toegankelijk voor al het verkeer. Met de realisatie van deze toegangsweg ontstaat voor de bewoners van de wijk Het Hoog en voor de bedrijven en voorzieningen aan de Karstraat een snellere verbinding naar de Van Elkweg. Tevens vermindert de verkeersdruk op de Papenstraat en is de verkeersveiligheid gewaarborgd. In dit kader dient een akoestisch onderzoek wegverkeerslawaaai te worden verricht, de aanleg van een weg en de bestudering van reconstructie in het kader van de wet geluidhinder (artikel 73 onder a).

## 1.2 Ligging plangebied

In noordoosten van de kern Bommel is het bedrijventerrein Houtakker II gelegen. Het bedrijventerrein wordt aan de westzijde begrenst door de Van Elkweg en aan de noordzijde door de toekomstige autosnelweg A15.

Figuur 1 De aan te leggen weg (rode streeplijn) en de recent aangelegde ontsluiting op de Van Elkweg (rode ovaal)

### **1.3 Doel van het onderzoek**

Om het initiatief mogelijk te maken moet volgens de artikelen 76a en 77 van de Wet geluidhinder (Wgh) en artikel 4.1 van het Besluit geluidhinder (Bgh) bij het nieuwe planologische regime waarin woningen of andere geluidsgevoelige bestemmingen mogelijk worden gemaakt binnen de zones van (spoor)wegen, akoestisch onderzoek worden verricht.

## 2 Wet- en regelgeving

### 2.1 Wet geluidhinder

#### 2.1.1 Zones

Langs wegen liggen zones. Binnen deze zones moet voor de realisatie van geluidgevoelige bestemmingen akoestisch onderzoek worden uitgevoerd.

##### **Wegverkeer**

De breedte van de zone is afhankelijk van het aantal rijstroken en de ligging van de weg: stedelijk of buitenstedelijk. De zone ligt aan weerszijden van de weg en is gemeenten vanuit de rand van de weg. De zones, zoals beschreven in artikel 74 van de Wgh, zijn weergegeven in de onderstaande tabel.

| Aantal rijstroken    | Zones langs wegen |                        |
|----------------------|-------------------|------------------------|
|                      | Stedelijk gebied  | Buitenstedelijk gebied |
| 1 of 2 rijstroken    | 200 meter         | 250 meter              |
| 3 of 4 rijstroken    | 350 meter         | 400 meter              |
| 5 of meer rijstroken | 350 meter         | 600 meter              |

Tabel 1 Overzicht van de zones langs wegen

Artikel 74 lid 2 van de Wgh maakt een uitzondering voor wegen met een 30 km/u-regime en woonerven. Deze wegen hebben geen zone en zijn daarmee niet onderzoeksplchtig<sup>1</sup>.

#### 2.1.2 Grenswaarden

De Wgh heeft tot doel geluidhinder te voorkomen en te beperken tot aanvaardbare geluidniveaus. In de Wgh zijn hiervoor twee soorten grenswaarden opgenomen:

- *Ten hoogste toelaatbare geluidsbelasting*: Deze waarde garandeert een goede woon- en leefsituatie binnen de invloedssfeer van een geluidbron (wegen, spoorwegen, enzovoort).
- *Maximale ontheffingswaarde*: Deze waarde geeft de hoogste gevelbelasting weer waarvoor een hogere waarde kan worden aangevraagd.

De grenswaarden zijn onder andere afhankelijk van de geluidbron (wegverkeer-, railverkeer- of industrielawaai), de ligging van de geluidgevoelige bebouwing (stedelijk of buitenstedelijk gebied) en het type geluidgevoelige bebouwing. In de volgende tabel zijn voor geluidgevoelige bestemmingen de ten hoogste toelaatbare geluidbelasting

<sup>1</sup> Conform artikel 74 lid 2 van de Wgh is voor 30 km/uur wegen geen onderzoeksplchtig. Op 3 september 2003 heeft de Afdeling bestuursrechtspraak van de Raad van State uitgesproken (nr. 200203751/1: Abcoude) dat nog niet geconcludeerd kan worden dat het project aanvaardbaar is vanuit het oogpunt van een goede ruimtelijke ordening (goed woon- en leefklimaat, zoals opgenomen in het Bouwbesluit). Daarom wordt bij 30 km-zones onderzocht of wordt voldaan aan de ten hoogste toelaatbare geluidbelasting van 48 dB of de maximale ontheffingswaarde op de gevel.

en de maximale ontheffingswaarde uit de Wgh weergeven voor wegverkeer en railverkeer.

|                                         | Wegverkeer                | Railverkeer            |
|-----------------------------------------|---------------------------|------------------------|
| <b>Stedelijk gebied</b>                 |                           |                        |
| Ten hoogste toelaatbare geluidbelasting | 48 dB (art. 82 Wgh)       | 55 dB (art. 4.9 lid 1) |
| Maximale ontheffingswaarde              | 63 dB (art. 83 lid 2 Wgh) | 68 dB (art. 4.10)      |
| <b>Buitenstedelijk gebied</b>           |                           |                        |
| Ten hoogste toelaatbare geluidbelasting | 48 dB (art. 82 Wgh)       | 55 dB (art. 4.9 lid 1) |
| Maximale ontheffingswaarde              | 53 dB (art. 83 lid 1 Wgh) | 68 dB (art. 4.10)      |

Tabel 3 Overzicht van de grenswaarden uit de Wgh

Gezien de ten hoogste toelaatbare geluidsbelasting en de maximale ontheffingswaarde kunnen zich drie situaties voordoen:

***Een geluidbelasting lager dan de ten hoogste toelaatbare geluidsbelasting***

In deze situatie zijn volgens de Wgh geen nadere acties nodig om de geluidgevoelige bebouwing te realiseren.

***Een geluidbelasting tussen de ten hoogste toelaatbare geluidbelasting en de maximale ontheffingswaarde***

In deze situatie dienen bij voorkeur maatregelen te worden getroffen om de geluidbelasting terug te brengen tot een waarde die lager is dan de ten hoogste toelaatbare geluidsbelasting. Wanneer er overwegende bezwaren zijn vanuit stedenbouwkundig, verkeerskundig, landschappelijk of financieel oogpunt, kan voor de geluidgevoelige bebouwing een hogere waarde worden aangevraagd. Voor het verlenen van hogere waarden kan de gemeente een gemeentelijk geluidbeleid vaststellen.

***Een geluidbelasting hoger dan de maximale ontheffingswaarde***

In deze situatie is de realisatie van geluidgevoelige bebouwing in principe niet mogelijk, tenzij geluidsbeperkende maatregelen worden getroffen waardoor de geluidbelasting daalt tot een waarde lager dan de ten hoogste toelaatbare geluidsbelasting of de maximale ontheffingswaarde.

### 2.1.3 **Reconstructie Wgh**

Bij een wijziging aan een weg, kan de geluidsbelasting op geluidgevoelige objecten toenemen. Dit is in de Wet geluidhinder beschreven onder de afdeling 4. Reconstructies. Indien redelijkerwijs kan worden aangenomen dat de reconstructie van een weg zal leiden tot een toename van de geluidsbelasting van 2 dB of meer vanwege andere wegen dan de te reconstrueren weg of – als een weg gedeeltelijk wordt gereconstrueerd – vanwege de niet te reconstrueren gedeelten daarvan, heeft het akoestisch onderzoek tevens betrekking op die andere wegen of de niet te reconstrueren gedeelten van de betrokken weg. De reconstructie geldt alleen voor wegen met een geluidzone. Een toename van 5 dB of meer wordt alleen acceptabel geacht mits er op een andere plaats de geluidsbelasting evenveel afneemt.

## 2.2 Hogere waarde procedure

Bij een geluidbelasting, na beschouwing van maatregelen, tussen ten hoogste toelaatbare geluidbelasting en de maximale ontheffingswaarde kan bij het college van burgemeester en wethouders (B en W), onder bepaalde voorwaarden, ontheffing van de ten hoogste toelaatbare geluidsbelasting worden aangevraagd.

Indien aanwezig moet worden voldaan aan één of meerdere subcriteria uit lokaal hogere waarden beleid. De gemeente Lingewaard maakt gebruik van de 'Nota geluidsbeleid' (rapportnummer: M.2005.0287.05.R001, d.d. 23 februari 2007) en de 'Nota hogere grenswaarden' (rapportnummer: M.2005.0287.05.R002, d.d. 28 maart 2007).

Onderhavig locatie is gelegen in de gebiedstypering 'industrie.' Voor deze gebiedstypering geldt als geluidsklasse een ambitie van 'onrustig' (55 dB t/m 58 dB voor railverkeer, 48 dB t/m 53 dB voor wegverkeer) en een bovengrens van 'lawaaig' (63 dB t/m 68 dB voor railverkeer, 58 dB t/m 63 dB voor wegverkeer).

Het plan heeft ook effect op locaties gelegen in het gebied 'woonwijken'. Voor deze gebiedstypering geldt als geluidsklasse een ambitie van 'redelijk rustig' (50 dB t/m 55 dB voor railverkeer, 43 dB t/m 48 dB voor wegverkeer) en een bovengrens van 'zeer onrustig' (58 dB t/m 63 dB voor railverkeer, 53 dB t/m 58 dB voor wegverkeer) tot 'lawaaig' (63 dB t/m 68 dB voor railverkeer, 58 dB t/m 63 dB voor wegverkeer).

Voor de grenswaardes bij een reconstructie geldt het volgende:

**Tabel 2 Waardes bij reconstructie volgens Nota hogere grenswaarden**

| Situatie                                                      | Voorkeurswaarde                                                                       | Ten hoogst toelaatbare geluidsbelasting | Hoogst toelaatbaar binnenniveau |
|---------------------------------------------------------------|---------------------------------------------------------------------------------------|-----------------------------------------|---------------------------------|
| Heersende geluidsbelasting <48                                | 48                                                                                    | 53                                      | 33                              |
| Eerder is een hogere waarde vastgesteld                       | Laagste van:<br>- heersende waarde voor reconstructie<br>- hogere vastgestelde waarde | 63 stedelijk<br>58 buitenstedelijk      | 33                              |
| Niet eerder hogere waarde vastgesteld en geluidsbelasting <53 | Heersende waarde vóór reconstructie                                                   | 63 stedelijk<br>58 buitenstedelijk      | 33                              |

## 2.3 Gecumuleerde geluidbelasting

De gecumuleerde geluidbelasting wordt berekend ter plaatse van de geluidgevoelige bestemmingen (waarvoor een hogere waarde wordt vastgesteld) die in meerdere geluidszones in de zin van de Wgh liggen. In het zesde lid van artikel 110a Wgh wordt aangegeven dat burgemeester en wethouders slechts hogere waarden vast kunnen

stellen, wanneer de gecumuleerde geluidsbelasting niet leidt tot een onacceptabele geluidbelasting.

De Wgh geeft geen grenswaarden voor de gecumuleerde geluidbelasting. Dit is derhalve ter beoordeling van het bevoegd gezag.

## **2.4 Rekenmethodieken**

### **2.4.1 *Rekenmethodiek voor de geluidbelastingen***

Volgens artikel 110d van de Wgh moet voor wegverkeer-, railverkeer- en industrielaawaai het “Reken- en meetvoorschrift geluid 2012” (RMG 2012) worden gevolgd. Voor de berekening van de geluidbelasting van een weg is de rekenmethodiek beschreven in bijlage III (hoofdstuk 3) van het RMG 2012. Voor de berekening van de geluidbelasting van een spoorlijn is de rekenmethodiek beschreven in bijlage IV (hoofdstuk 3) van het RMG 2012. Voor de berekening van de geluidbelasting van een gezoneerd industrieterrein is de rekenmethodiek beschreven in de Handleiding meten en rekenen industrielaawaai 1999.

De reken- en meetvoorschriften schrijven voor dat het equivalente geluidniveau moet worden bepaald volgens standaardrekenmethode 2, maar dat in bepaalde situaties kan worden volstaan met een eenvoudigere standaardrekenmethode 1-berekening. Standaardrekenmethode 1 is gebaseerd op een vereenvoudiging van de situatie, waarbij ten aanzien van het toepassingsbereik van de methode, voorwaarden worden gesteld. In voorliggende situatie is gerekend met standaardrekenmethode 2, hiervoor is gebruikgemaakt van het computerprogramma Winhavik (versie 9.0.2).

### **2.4.2 *Rekenmethodiek voor de gecumuleerde geluidbelasting***

Cumulatie is alleen van belang in situaties waarin geluidgevoelige bebouwing wordt blootgesteld aan meerdere geluidbronnen. Op basis van bijlage I, hoofdstuk 2: “Rekenmethode gecumuleerde geluidbelasting” uit het RMG 2012 hoeven bronnen, die niet zorgen voor een overschrijding van de ten hoogste toelaatbare geluidbelasting, niet betrokken te worden in de berekening van de gecumuleerde geluidbelasting. De gecumuleerde geluidbelasting wordt in het kader van de bepaling van de gevelwering berekend exclusief aftrek artikel 110g Wgh.

### 3 Onderzoeksgegevens

De verkeersgegevens zijn verstrekt door de gemeente Lingewaard en zijn gebaseerd op de verkeersstudie ontsluiting Houtakker II, Goudappel Coffeng, d.d. 24 augustus 2018, kenmerk 001523.20180720.N1.03 (Goudappel). In het onderzoek zijn de volgende situaties uitgegaan:

- Autonome situatie: De toekomstige situatie zonder ontsluiting op de Karstraat/Deellaan, maar met alle andere ontwikkelingen (de referentiesituatie).
- Variant 1: Houtakker II met een selectieve ontsluiting op de Karstraat/Deellaan (alleen voor de brandweer en transportbedrijf Derks).
- Variant 2: Houtakker II met een volwaardige ontsluiting op de Karstraat/Deellaan.

Gekozen is voor een volwaardige ontsluiting op de Karstraat/Deellaan (variant 2). Het akoestisch onderzoek richt zich op de aanleg van de doortrekking van de Kazematten op de Karstraat (variant 2) en op de reconstructie van wegen, het verschil tussen de autonome situatie en variant 2. De beoordelingsjaren zijn 2019 (jaar voor de plan aanleg) en 2030 (10 jaar na aanleg). Het onderzoek van Goudappel baseert zich op de jaren 2017 en 2027. Er wordt uitgegaan van een autonome groei van 1%.

#### 3.1 Selectie van geluidbronnen

##### 3.1.1 *Snelheid wegen*

Voor de wegen op het bedrijventerrein, de Karstraat, de Deellaan, Herckenrathweg en de Papestraat geldt een maximumsnelheid van 50 km/uur. Voor de Van Elkweg geldt een maximum snelheid van 80 km/uur.

##### 3.1.2 *Wegverharding*

De wegverharding van de, voor dit onderzoek, relevante wegen bestaat uit dichtasfaltbeton (DAB).

##### 3.1.3 *Verkeersintensiteiten wegen*

In figuur 2 is een uitsnede van het basisjaar 2017 van Goudappel weergegeven. In tabel 4 zijn de verkeersintensiteiten vertaald voor het akoestisch onderzoek. Goudappel werkt daarnaast ook met werkdagemaalintensiteiten, terwijl een akoestisch onderzoek uit moet gaan weekdagemaalintensiteiten. De omrekenfactor is 0,89.

Figuur 2. Basisjaar 2017 Goudappel, werkdagemaalintensiteit

Figuur 3. Basisjaar 2027, Variant 2 Goudappel, werkdagemaalintensiteit

Tabel 4. Overzicht gegevens

| locatie | basisjaar 2017 | huidige situatie 2019 | variant 2 werkdag 2027 | toekomstige situatie 2030 | toename in% |
|---------|----------------|-----------------------|------------------------|---------------------------|-------------|
| C       | 2200           | 2000                  | 2900                   | 2700                      | 35          |
| D       | 0              | 0                     | 2300                   | 2200                      | aanleg      |
| E       | 0              | 0                     | 5600                   | 5200                      | aanleg      |
| F       | 1300           | 1200                  | 900                    | 900                       | -25         |
| N       | 500            | 500                   | 600                    | 600                       | 20          |
| M       | 3000           | 2800                  | 1500                   | 1400                      | -50         |
| I       | 10200          | 9300                  | 9200                   | 8500                      | -9          |
| G       | 15700          | 14300                 | 13600                  | 12500                     | -13         |

De verkeersgegevens voor de jaren 2019 en 2030 zijn weekdagetmaalintensiteiten. In tabel 5 is een overzicht van de voertuigverdeling weergegeven.

Tabel 5. Verdeling voertuigen

| verdeling              | woonwijk | overig |
|------------------------|----------|--------|
| lichte voertuigen      | 97       | 92     |
| middelzware voertuigen | 2        | 5      |
| zware voertuigen       | 1        | 3      |

Alleen op wegvak c (Deellaan) heeft een lagere vrachtwagenverdeling. In de rapportage van Goudappel is geen informatie verstrekt over de verdeling van voertuigen. De gehanteerde verdeling is niet gebaseerd op Infomil, maar ervaringsgegevens van SAB.

### 3.1.4 Bebouwing en waarneemhoogten

De waarneempunten zijn, rekening houdend met de bestaande geluidsgevoelige objecten, met als standaard 1½, 3½ en 7½ meter op de gevel boven het maaiveld.

### 3.1.5 Aftrek ex artikel 110g Wgh

Voor wegen waar de representatief te achten snelheid lager is dan 70 km/uur wordt een correctie toegepast van 5 dB. Indien de geluidbelasting 57 dB bedraagt, is de aftrek 4 dB. Bij een geluidbelasting van 56 dB bedraagt de correctie 3 dB. Indien een andere geluidbelasting wordt berekend bedraagt de correctie 2 dB.

In dit onderzoek wordt een correctie van 5 dB<sup>2</sup> toegepast aangezien de snelheden lager liggen dan 70 km/uur.

| Maximum snelheid wegen | Aftrek ex artikel 110g Wgh |
|------------------------|----------------------------|
| < 70 km/uur            | - 5 dB                     |
| ≥ 70 km/uur            | - 2 dB                     |
|                        | Bij 57 dB - 4 dB           |
|                        | Bij 56 dB - 3 dB           |

Tabel 6 Aftrek ex artikel 110g Wgh

<sup>2</sup> Op grond van de Wgh moet bij wegen met een snelheid tot 70 km/uur een aftrek voor het stiller worden van het verkeer (aftrek op grond van artikel 110g Wgh) van 5 dB worden toegepast. Voor 30 km/uur wegen is deze aftrek niet vastgelegd in de Wgh, omdat deze geen zone hebben. Bij lagere snelheden is het aandeel motorgeluid hoger dan van het bandengeluid. Het is aannemelijk dat het motorgeluid in de toekomst sterk zal afnemen, door gebruik van elektrische en hybride auto's, bij 30 km/uur wegen is dan ook de aftrek voor het stiller worden van het verkeer (aftrek op grond van artikel 110g Wgh) van 5 dB toegepast. Hiermee is aangesloten bij de Raad van State uitspraak bij het bestemmingsplan "Parijsch Zuid" in Culemborg (zaaknummer: 201304862/3/R2).

## 4 Onderzoek

In figuur 4 is een overzicht gegeven van de geluidsgevoelige objecten nabij het onderzoeksgebied (Basisregistratie Adressen en Gebouwen, BAG, Kadaster).

Figuur 4. Overzicht van mogelijk geluidsgevoelige objecten (blauw accent)

### 4.1 Onderzoeksopzet

Volgens de Wgh en het gemeentelijk beleid mag voor geluidgevoelige bestemmingen de geluidbelasting in principe niet hoger zijn dan de ten hoogste toelaatbare geluidbelasting. Als de geluidbelasting hoger is dan de ten hoogste toelaatbare geluidbelasting, wordt getoetst of de geluidbelasting lager is dan de maximale ontheffingswaarde. In deze situatie zijn de geluidgevoelige bestemmingen tussen de Karstraat, Papenstraat en Van Elkweg in het gebied 'industrie.' De overige geluidgevoelige bestemmingen zijn gelegen in het gebied 'woonwijk.'

De bovengrens voor de geluidbelasting voor wegverkeer bedraagt in beide gebieden 63 dB. Aangezien het een reconstructie betreft, is hier de 5 dB verhoging van belang. Een geluidbelasting van 63 dB kan enkel bereikt worden als de huidige waarde 58 dB bedraagt.

### 4.2 Bepalen van de geluidbelastingen

De geluidbelasting wordt bepaald met behulp van de standaardrekenmethode 2-berekening. Conform de Wgh wordt de geluidbelasting getoetst per bron en dus per weg.

De grafische weergave van het model is weergegeven in de overzichtstekening van bijlage A. In bijlage B is een rapportage met de invoergegevens en rekenresultaten van het model opgenomen.

### 4.3 Geluidbelasting aanleg nieuwe weg

De Kazematten wordt doorgetrokken naar de Karstraat. Dit wegvak is een nieuwe weg. De omliggende woningen worden in dit kader beoordeeld. In figuur 5 is de geluidsbelasting van de Kazematten op de omliggende geluidsgevoelige objecten.

Figuur 5 Hoogst berekende geluidbelasting vanwege de Kazematten (incl. corr. art. 110g Wgh)

Uit de berekeningen blijkt dat als gevolg van de Kazematten er een overschrijding plaatsvindt van de ten hoogste toelaatbare geluidsbelasting op de woning Karstraat 26. De hoogste geluidbelasting bedraagt 52 dB. Dit valt binnen de geluidsklasse van de ambitie van 'onrustig.' Bij deze klasse hoort namelijk 48 dB t/m 53 dB voor wegverkeer. De maximale ontheffingswaarde wordt niet overschreden. De achtergevel en de zuidgevel van deze woning is geluidsluw. Op alle andere woningen wordt de ambitie behorende bij het gebied 'woonwijk' ook niet overschreden.

## 4.4 Reconstructie

Door de nieuwe verbinding vindt er ook meer verkeer plaats op de Karstraat. In tabel 7 is een overzicht van de geluidsbelasting van de huidige en de toekomstige situatie weergegeven ten gevolge van de Karstraat. De toekomstige situatie is gemodelleerd met een referentiewegdek.

Tabel 7 bepaling reconstructie ten gevolge van de Karstraat (waarden in dB, incl. aftrek 110g Wgh)

| wn<br>p | adres                    | wnh  | Huidige si-<br>tuatie | toekomstige<br>situatie | toena-<br>me | Reconstruc-<br>tie |
|---------|--------------------------|------|-----------------------|-------------------------|--------------|--------------------|
| 1       | Karstraat 26 noord       | 1,50 | 38,68                 | 45,10                   | -            |                    |

| 5       | Karstraat 17b            | 4,50 | 48,53                 | 51,97                   | 3,97         | <b>R</b>           |
| 6       | Karstraat 26 achtergevel | 1,50 | 9,47                  | 10,74                   | -            |                    |
| 6       | Karstraat 26 achtergevel | 4,50 | 10,38                 | 12,85                   | -            |                    |
| 7       | Karstraat 26 zuid        | 1,50 | 42,34                 | 47,81                   | -            |                    |
| 7       | Karstraat 26 zuid        | 4,50 | 42,91                 | 48,64                   | 0,64         | -                  |
| 13      | Karstraat 17a            | 1,50 | 47,16                 | 49,18                   | 1,18         | -                  |
| 13      | Karstraat 17a            | 4,50 | 48,39                 | 50,23                   | 1,84         | <b>R</b>           |
| 14      | Karstraat 17             | 1,50 | 47,82                 | 48,68                   | 0,68         | -                  |
| 14      | Karstraat 17             | 4,50 | 47,91                 | 49,18                   | 1,18         | -                  |
| 15      | Karstraat 17             | 1,50 | 53,15                 | 51,48                   | -            |                    |
| 15      | Karstraat 17             | 4,50 | 53,36                 | 51,88                   | -            |                    |
| 16      | Karstraat 15b            | 1,50 | 53,86                 | 51,27                   | -            |                    |
| 16      | Karstraat 15b            | 4,50 | 54,17                 | 51,63                   | -            |                    |
| 17      | Karstraat 15a            | 1,50 | 54,10                 | 51,33                   | -            |                    |
| 17      | Karstraat 15a            | 4,50 | 54,45                 | 51,65                   | -            |                    |

Uit de berekeningen blijkt dat op de woningen Karstraat 26, 23, 19, 17b en 17a een significante overschrijding (een toename hoger dan 1,5 dB en een geluidbelasting hoger dan de ten hoogste toelaatbare geluidbelasting van 48 dB) optreedt. Op deze woningen is sprake van reconstructie. Derhalve dienen maatregelen overwogen te worden.

## 4.5 Maatregelen

Er is onderzocht of, en zo ja, welke doeltreffende maatregelen mogelijk zijn om de geluidbelasting terug te brengen tot een waarde die lager of gelijk is aan de voorkeurs-

grenswaarde. Bij het treffen van maatregelen geldt een voorkeursvolgorde: bron, overdracht en ontvanger.

#### **4.5.1 Bronmaatregelen**

##### *Geluidstil asfalt*

Op de Karstraat bevindt zich een standaard asfaltverharding (dichtasfaltbeton). De Kazematten betreft een nieuw aan te leggen weg, hier kan vanaf het begin gekozen worden voor een geluidstil asfalt. Door de gemeente is aangegeven dat het toepassen van een SMArdpave wegdek tot de mogelijkheden behoort. Of het toepassen van dit type wegdek effectief is in dit geval, wordt in dit onderzoek nader onderzocht.

Vermindering van snelheid en intensiteit is om verkeerskundige redenen niet acceptabel en wordt ook niet behandeld.

#### **4.5.2 Overdrachtsmaatregelen**

##### *Afstand vergroten*

Een mogelijkheid om de geluidbelasting te reduceren is het vergroten van de afstand tussen het plan en de bron. De Karstraat betreft een reconstructie, dit is hier niet mogelijk. Ook voor de Kazematten is dit niet mogelijk aangezien het plan het verbinden van twee wegen betreft.

##### *Afscherming*

Een geluidsscherm langs de Karstraat is stedenbouwkundig niet gewenst maar ten noorden van de Karstraat 26 zou een (laag) geluidsscherm eventueel mogelijk zijn. Of dit efficiënt is wordt nader onderzocht.

#### **4.5.3 Maatregelen aan de gevel**

De maatregelen die kunnen worden genomen bij de ontvanger (woningen) zijn erop gericht om te voldoen aan de binnenwaarde van 33 dB.

### **4.6 Onderzoek maatregelen**

#### **4.6.1 Geluidreducerend asfalt**

Door de Kazematten en het wegvak Karstraat tussen de Deellaan en de Kazematten te voorzien van SMArdpave levert dit een reductie op.

In figuur 6 zijn de resultaten ten gevolge van de aanleg van de verlengde Kazematten met een SMArdpave wegdek weergegeven.

Figuur 6. Geluidsbelasting ten gevolge van Kazematten (SMArdpave), incl. aftrek art. 110g Wgh

Door de maatregel is de geluidsbelasting op de woning Karstraat 26 met 2 dB afgenomen naar ten hoogste 50 dB. Deze waarde valt nog steeds binnen de geluidsklasse van de ambitie van 'onrustig.' Bij deze klasse hoort namelijk 48 dB t/m 53 dB voor wegverkeer. De maximale ontheffingswaarde wordt niet overschreden. De achtergevel en de zuidgevel van deze woning is geluidsluw, als ook het geval met dichtasfaltbeton.

In tabel 8 zijn de resultaten weergegeven van de reconstructie voor de Karstraat indien deze in SMArdpave wordt uitgevoerd.

Tabel 8 bepaling reconstructie ten gevolge van de Karstraat met SMArdpave (waarden in dB, incl. aftrek 110g Wgh)

| wnp | adres                    | wnh  | Huidige situatie | toekomstige situatie met maatregel | toename | Reconstructie |
|-----|--------------------------|------|------------------|------------------------------------|---------|---------------|
| 1   | Karstraat 26 noord       | 1,50 | 38,68            | 42,41                              | -       |               |
| 1   | Karstraat 26 noord       | 4,50 | 39,43            | 43,15                              | -       |               |
| 2   | Karstraat 26 voorgevel   | 1,50 | 46,58            | 49,81                              | 1,81    | <b>R</b>      |

| 5   | Karstraat 17b            | 4,50 | 48,53            | 49,73                              | 1,20    |               |
| 6   | Karstraat 26 achtergevel | 1,50 | 9,47             | 9,85                               | -       |               |
| 6   | Karstraat 26 achtergevel | 4,50 | 10,38            | 11,71                              | -       |               |
| 7   | Karstraat 26 zuid        | 1,50 | 42,34            | 45,25                              | -       |               |
| 7   | Karstraat 26 zuid        | 4,50 | 42,91            | 46,04                              | -       |               |
| 13  | Karstraat 17a            | 1,50 | 47,16            | 47,27                              | -       |               |

| wnp | adres         | wnh  | Huidige situatie | toekomstige situatie met maatregel | toename | Reconstructie |
|-----|---------------|------|------------------|------------------------------------|---------|---------------|
| 13  | Karstraat 17a | 4,50 | 48,39            | 48,36                              | -       |               |
| 14  | Karstraat 17  | 1,50 | 47,82            | 47,09                              | -       |               |
| 14  | Karstraat 17  | 4,50 | 47,91            | 47,47                              | -       |               |
| 15  | Karstraat 17  | 1,50 | 53,15            | 50,81                              | -       |               |
| 15  | Karstraat 17  | 4,50 | 53,36            | 51,13                              | -       |               |
| 16  | Karstraat 15b | 1,50 | 53,86            | 51,06                              | -       |               |
| 16  | Karstraat 15b | 4,50 | 54,17            | 51,39                              | -       |               |
| 17  | Karstraat 15a | 1,50 | 54,10            | 51,19                              | -       |               |
| 17  | Karstraat 15a | 4,50 | 54,45            | 51,51                              | -       |               |

De reconstructiewaarde bedraagt hierdoor maximaal 2,45 dB en is waarneembaar op de woning Karstraat 19. Dit is een afname ten opzichte van de situatie met referentiewegdek van 2,52 dB voor Karstraat 19 (waarneemhoogte 7,5 meter). Ook vindt hierdoor geen reconstructie meer plaats op Karstraat 23 en 17a. Op Karstraat 17b bedraagt de toename van de geluidsbelasting minder dan 1,5 dB en dus is ook hier geen sprake meer van reconstructie. Reconstructie vindt nog wel plaats op de woningen Karstraat 26 en 19.

Voor alle woningen waarbij sprake is van reconstructie dient een procedure hogere grenswaarde te worden doorlopen. Daarnaast dient voor de woningen Karstraat 26 en 19 een bouwakoestisch onderzoek te worden verricht ter bepaling van eventuele gelvmaatregelen ten behoeve van waarborging van een acceptabel binnenklimaat. Dit navolgend onderzoek dient plaats te vinden na vaststelling van het hogere waardenbesluit.

#### 4.6.2 Afscherming

Door een anderhalve meter hoge afscherming (met een lengte van circa 90 meter) te plaatsen ten noorden van de woning aan de Karstraat 26 welke 1,2 meter van de zijkant van de weg gelegen is in combinatie met het geluidstil(ler) asfalt SMARDpave, zorgt dit voor een geluidreductie ten opzichte van de eerder doorberekende situatie. In dit geval is de hoogste geluidbelasting 47 dB. Dit is lager dan de ten hoogste toelaatbare geluidbelasting. In dit geval hoeven geen hogere grenswaardes aangevraagd te worden. Deze aanvullende maatregel zal kostentechnisch en landschappelijk echter niet doelmatig/wenselijk zullen zijn en wordt daarom niet uitgevoerd.

Figuur 7. Geluidsbelasting ten gevolge van Kazematten (SMARDpave met scherm), incl. aftrek art. 110g Wgh

## 4.7 Toetsing aan het Bouwbesluit 2012

Op grond van het Bouwbesluit 2012 worden eisen gesteld aan de akoestische binnenwaarde. Bij het bepalen van de vereiste gevelgeluidwering wordt rekening gehouden met de berekende geluidbelasting op de gevels van de geluidgevoelige bestemmingen exclusief aftrek conform art. 110g Wgh. In het kader van een goed woon- en leefklimaat kan daarbij rekening worden gehouden met de gecumuleerde geluidbelasting vanwege alle relevante geluidbronnen. Voor woningen Karstraat 26 en 19 dient een procedure hogere grenswaarde te worden doorlopen en dient een acceptabele binnenwaarde te worden gewaarborgd.

Uit de berekening blijkt dat de hoogst gecumuleerde geluidbelasting (exclusief aftrek conform artikel 110g Wgh) 57 dB bedraagt voor Karstraat 19 en 56 dB voor Karstraat 26, zoals weergegeven in figuur 8. De binnenwaarde mag conform het Bouwbesluit 2012 maximaal 33 dB te bedragen. De minimaal benodigde gevelreductie dient dus minimaal  $57 - 33 = 24$  dB te bedragen voor Karstraat 19 en minimaal  $56 - 33 = 23$  dB te bedragen voor Karstraat 26.

In een aanvullend bouwakoestisch onderzoek, na vaststelling van het hogere waardenbesluit, dient te worden aangetoond dat de binnenwaarde van 33 dB uit het Bouwbesluit 2012 wordt gewaarborgd.

Figuur 8. Gecumuleerde geluidbelasting, excl. aftrek art. 110g Wgh  
(De Kazematten en het wegvak Karstraat tussen de Deellaan en de Kazematten uitgevoerd als SMARDpave)

## 5 Conclusie

### ***Aanleg nieuwe weg***

De gemeente Lingewaard is voornemens de Kazematten door te trekken naar de Karstraat. Hierdoor wordt een nieuwe weg aangelegd. Op de woning Karstraat 26 zal hierdoor de geluidsbelasting op de noordgevel 52 dB bedragen bij het toepassen van een wegdek bestaande uit dichtasfaltbeton. De achtergevel en de zuidgevel van deze woning is geluidsluw. Ook is sprake van een geluidsluwe buitenruimte. Een geluidbelasting van 52 dB past binnen de ambitie voor 'industrie'-gebieden volgens het gemeentelijk hogere waarden beleid.

Maatregelen zijn onderzocht. Het toepassen van een SMArdpave wegdek levert een hoogste geluidbelasting op van 50 dB. Dit is hoger dan de ten hoogste toelaatbare geluidbelasting en hiervoor dient daarom een procedure hogere grenswaarde te worden doorlopen van 50 dB wanneer de Karstraat wordt uitgevoerd als SMArdpave.

Indien aanvullend een 1,5 meter hoge afscherming wordt geplaatst op 1,2 meter van de zijkant van de weg zorgt dit voor een hoogste geluidbelasting van 47 dB. De afscherming is in onderhavige berekening ingevoerd over een lengte van circa 90 meter. Bij deze waarde hoeven geen hogere waarde aangevraagd te worden. Deze aanvullende maatregel zal kostentechnisch en landschappelijk echter niet doelmatig/wenselijk zullen zijn en wordt daarom niet uitgevoerd.

Op alle overige, in dit onderzoek getoetste, woningen vindt er geen overschrijding plaats (van de aanleg van de nieuwe weg, zonder te treffen geluidsmaatregelen). Daarmee wordt voldaan aan de Wet geluidhinder.

### ***Reconstructie***

Door de toename van het verkeer op het wegvak Karstraat tussen de Deellaan en de Kazematten is er sprake van reconstructie in de zin van de Wet geluidhinder. Indien de Karstraat als dichtasfaltbeton behouden blijft zorgt dit voor een reconstructie op de woningen aan Karstraat 26, 23, 19, 17b en 17a.

Maatregelen zijn onderzocht. Een mogelijkheid is het toepassen van het geluidstil(ler) asfalt SMArdpave voor de Kazematten en het wegvak Karstraat tussen de Deellaan en de Kazematten. Op de Karstraat 23, 17a en 17b zal dan niet meer sprake zijn van reconstructie. Op de woningen Karstraat 26 en 19 is hiervan nog wel sprake. Voor deze twee woningen dient daarom een procedure hogere grenswaarde te worden doorlopen van respectievelijk 50 dB en 52 dB.

### ***Toetsing aan het Bouwbesluit 2012***

Voor de woningen Karstraat 26 en 19 is een bouwakoestisch onderzoek benodigd ter bepaling van eventuele gevelmaatregelen ten behoeve van waarborging van een acceptabel binnenklimaat. De binnenwaarde mag conform het Bouwbesluit 2012 maximaal 33 dB te bedragen. De minimaal benodigde gevelreductie dient minimaal 24 dB te bedragen voor Karstraat 19 en minimaal 23 dB te bedragen voor Karstraat 26.
